Aluminium

'DC-3' desk model aeroplane. The DC-3 earned the nickname 'Workhorse of the Skies'. The Douglas company's factories produced thousands of them between the end of the Second World War and the 1950s, for military, civil, government and private use. Extraordinarily reliable. Even today, they can still be found flying to remote airports, landing on the narrowest runways. Legendary and nostalgic. Aluminium, riveted propellers – noisy but reassuring and familiar.
