

Produit Globe with dry compass on a stand
Référence 17715

Globe with dry compass on a plinth

. Traditional globes without a compass were considered incomplete. The bronze and wood plinth showcases the globe and features a faithful reproduction of a 17th-century dry compass. Twelve paper meridian bands, delicately applied to the globe, are printed from the originals drawn by Gerard Kremer (Gerardus Mercator), the inventor of the Mercator projection, which was used from the 16th century until the mid-20th century.

Scientific, decorative and historical

Origin: Asian

Period: New

Materials: Wood

Dimensions: Height 22 x diameter 15 cm

Caractéristiques

Dimensions	Ht 22 x diamètre 15 cm
Matériaux	Bois
Origine	Asiatique
Époque	Neuf

Prix 128.00 TTC
