magnifying glass My first magnifying glass was a Scout model, a sturdy, practical brass one. I used it to study insects and the skin on my hand. However, after I turned my father's newspaper to ashes, it was confiscated, despite my protest that the magnifying glass was an essential tool for scientific discovery. Our discovery magnifying glass allows for a detailed examination of maps, coins and other wonders. Origin: Asian Period: New Materials: Brass

Dimensions: H 1.5 x 13 x 5.5 cm

Caractéristiques

Dimensions	Ht 1.5 x 13 x 5.5 cm
Material	Laiton
Origin	Asiatique
