"Champagne Bar"

Trunk Hollywood loves to show, in its films, bottles of champagne bursting with a loud pop, corks flying across the room and the fizzy drink splashing all over the party guests. That's not the right way to do it, and it would be a shame to waste such a marvellous drink. The champagne glasses of the Roaring Twenties and *The Great Gatsby* were flutes. Legend has it that these saucer-shaped flutes were modelled on the breasts of Madame de Pompadour, the mistress of the French King Louis XV. Isn't that the ideal for a luxurious and decadent party? It's best to follow champagne etiquette to fully enjoy one of the finest mood-lifters there is.
