

Produit	Wood wax
Référence	29072

“Secrets d’Atelier”
Wood Wax 200 ml

A paste made from beeswax and carnauba wax with a non-toxic solvent based on fatty

acid esters Drying time:
12 to 24 hours depending on the surface

Coverage:
Approximately 5 m² per 200 ml

Storage and preservation:
In a dry place, away from heat

Cleaning of equipment:
With water and black

ADVANTAGES

Natural, non-toxic raw materials. Allows the surface to breathe. Authentic, natural finish that adds depth and character. Can be cold-tinted with natural pigments.

APPLICATION

Application instructions

: The surface must be clean, free from grease and sanded.

Recommendations

: Apply a first thin coat of wax - this should be as thin as possible - and repeat the process once dry (approximately 24 hours); the wood must have absorbed the first coat to properly accept the second.

Moinat SA, Route de Genève 20, 1180 Boll, Téléphone : +41 21 822 52 00, Email: info@moinat.ch
Softwood will generally absorb more wax than hardwood. Adjust the drying times and the number of coats according to the surface being treated.

After the final coat, allow to dry thoroughly and polish; this brings out the shine of the wax and seals the protective layer. Maintain with the Renovator for worktops, tables and any high-traffic surfaces.

Areas of use

: Furniture, objects and untreated wooden surfaces indoors.

Tips and tricks

: Wipe with a dry cloth between coats (after 12 hours) to speed up drying. A wax treatment gives a very natural and warm finish. If water marks appear on a wax-treated surface, apply the
