

Produit Small praxinoscope, brown stand
 Référence 34281

Small praxinoscope, brown stand; praxinoscope, black stand, supplied with 20 animated

strips. The PRAXINOSCOPE was invented by the Frenchman Emile REYNAUD in 1876. Thanks to its cylinder of mirrors, which eliminates the need for a shutter between each image, this optical toy provides better visibility of the animated strips compared to previously existing optical toys
