

Produit "Ford Trimotor" model aeroplane
 Référence 4203A

Aluminium

model of the "Ford Trimotor" aeroplane. Between 1926 and 1933, around 200 three-engined aircraft were built at the Ford factories. Corrugated metal and a thick monoplane wing were a German innovation, used in the Junker JU-52 on the Berlin-Rome-London route. These three-engined aircraft were purchased by airlines, oil companies and a select few. The Ford three-engine aircraft and the Junker JU-52 were the forerunners of the Douglas and Boeing generations, whose fleets were soon to criss-cross the globe.

The Tin Goose Origin: Asian
 Period: New
 Materials: Aluminium

Dimensions: H 20 x 102 x 67 cm

Caractéristiques

Dimensions	Ht 20 x 102 x 67 cm
Material	Aluminium
Origin	Asiatique
Era	Neuf

Prix CHF 780.00 TTC
